## About Training

### About Training

This introduction course covers some of the basic and more commonly used features of Adobe Photoshop so that attendees can navigate the software and use Photoshop's tools to work with digital images. In addition, an orientation of Adobe Bridge and organisation and management of digital assets using Bridge is covered.

Although Photoshop is used by a variety of professionals, from marketing departments and organisations, from photographers to designers, this introduction course focuses primarily on the photography component.

This course is suitable for anyone using Photoshop CS5, CS6 or CC. If attending in a QA centre then the course will be delivered using Photoshop CS6.

### What You'll Learn

- Navigate their way around the Photoshop and image environment
- Gain a basic understanding of the purpose and benefits of using Adobe Bridge
- Understand image size, resolution and colour modes
- Create and modify selections
- Work with layers, layer groups, styles and blending modes
- Use common image retouching tools and filters
- Output images from Photoshop
