About Training

About Training

Mastering critical thinking and problem-solving skills can help you make better decisions or recommendations – an essential competency in today’s knowledge workplaces. Critical thinking helps you to examine and improve thought processes, ask the right questions, challenge assumptions and consider varying viewpoints. Effective problem-solving helps you to properly identify and systematically work through a problem in a comprehensive manner, ensuring clarity when it comes time to make decisions or recommendations.

This course will demonstrate how critical thinking, problem-solving and decision-making work optimally together, and will provide hands-on practice with tools that you can apply to your everyday workday tasks, big or small.

What You'll Learn

- Define critical thinking and identify your critical thinking styles
- Work through the critical thinking process to build, analyze and evaluate varying viewpoints
- Improve key critical thinking skills, including active listening and questioning
- Analyze context and information to clearly understand and identify a problem
- Apply problem solving steps and tools
- Identify appropriate solutions using specific approaches
- Select the best technique for making decisions
- Avoid common decision-making mistakes

Who Should Attend

Anyone who is required to problem solve on the job or make important project, department or organizational decisions or recommendations.
