

HBase For Developers

Training Calendar

Date	Training Time	Location
04 February 2019	3 Days	Bilginç IT Academy
14 October 2019	3 Days	Bilginç IT Academy

Training Details

Training Time	:	3 Days
Capacity	:	10
Prerequisites	:	Comfortable with Java programming language, comfortable in Java programming language (navigate Linux command line, edit files with vi / nano), and a Java IDE like Eclipse or IntelliJ

About Training

About Training

This course introduces HBase – a NoSQL store on top of Hadoop. The course is intended for developers who will be using HBase to develop applications, and administrators who will manage HBase clusters.

What You'll Learn

- HBase architecture and design
- HBase internals

- Using APIs to interact with HBase
- Data modeling on HBase

Who Should Attend

- Developers & Administrators

Outline

Lab Environment: A working HBase cluster will be provided for students. Students would need a SSH client and a browser to access the cluster.

Zero Install: There is no need to install HBase software on students' machines.
