## About Training

### About Training

This training course aims at helping attendees understand concepts and principles of the Business Motivation Model (BMM) to meet the business goals and strategies of the companies and establish the bridge to the Enterprise Architecture Framework in order to implement them in coherence.

Concepts explained during the course are reinforced by examples and case study illustrations. In case of "on-site" delivery of this workshop, we may also adapt its content and case studies to your needs and business case in order to provide you with a good starting point and roadmap. After this workshop, we can also accompany you through review sessions for validating your business architecture solutions conformance to your business needs.

## What You'll Learn

- Business Agility : Elements of the Strategy Models, Business Architectures and Operating Models using ArchiMate
- Business Transformation : From Goals and Objectives to the EA Implementation  
Developing the Architecture using the ADM
- Planning the Migration and Implementing the Architecture

## Outline

- Recap on the steps for an efficient bridge between Strategies and EA Implementation
- Tools that allow connections between Strategies and EA Operating Model steps
