

# Oracle Data Integrator 12c: New Features

## Training Details

Training Time	:	1 Day
Capacity	:	16
Prerequisites	:	There are no prerequisites for this course.

## About Training

### About Training

This Oracle Data Integrator workshop details the new features and techniques of using Oracle Data Integrator 12c (ODI) for implementing high-performance movement. Expert Oracle University instructors will help you explore transformation of data among various platforms. Investing in this course will teach you how to improve performance and reduce integration costs across your organization's heterogeneous systems. Centralize data across databases using your new skills to perform data integration, design mappings, debug integration projects and enhance ODI security.

### What You'll Learn

- Design ODI mappings and packages to perform ELT data transformations
- Implement multiple target loads and in-session parallelism
- Describe methods of integration of ODI 12c in Enterprise environment
- Perform debugging ODI mappings and packages using Step-by-Step debugger
- Become familiar with various ODI components
- Develop data transformation projects by using ODI 12c Declarative flow-based user interface

### Who Should Attend

- Database Administrators
- Business Analysts
- Data Warehouse Developer
- Process Developer

## Outline

- Introduction
- Developing Mapping in ODI 12c
- Step-by-Step Debugger
- Integration of ODI in Enterprise Environment and Using Common Administration Model
