About Training

About Training

Designing your Enterprise Architecture into Practice

This course aims at helping attendees understand how to put in practice an EA to meet the enterprise business strategies.

Concepts and techniques explained during the course are progressively applied by the attendees using a case study and different exercises on it.

What You'll Learn

- Essential concepts of Sparx EA for implementing an Enterprise Architecture

- Business Transformation : From Drivers, Goals and Objectives to the Architecture Vision
- Structuring Capabilities to mitigate risks and analyze Impacts throughout Architecture Layers
- Modeling the Roadmap, Transition Architectures to Coordinate Implementation Projects
- Plugging Solution Building Blocks into Capability Based SOA Backbone
- Exercise on the Case Study

In case of "on-site" delivery of such a workshop session, we may also adapt its content and case studies to your needs and business case in order to provide you with a good starting point and roadmap. After this workshop, we can also accompany you through review sessions for validating your architecture solutions conformance to your business needs.

Who Should Attend

TOGAF Certified Architects or Practitioners that are interested in putting EA in practice
